

## **Message Center Notice**

Short Title: Programming Update

Long Title: Upcoming Changes to your Lineup

Message:

FiOS TV Customer:

In order to keep you fully informed of all service and/or programming-related changes on the FiOS TV service, we would like to notify you of some channel location changes that will occur effective April 15th, 2009.

The Music Choice network, accessed on channels 1800-1846, will be undergoing some realignment activity.

You can obtain the new channel locations that will be effective 4/15/09 by tuning to the current channel. If that particular channel is scheduled to move on 4/15 – there will be a message in the "info" section of your channel guide directing you to the channel's new location. You can access the "info" section simply by tuning to the channel and pressing the "guide" button on your FiOS TV remote.

This will prompt your channel guide to appear on screen and you will find the new channel location given in the last line of the program description next to the program rating.

Thank you for being a loyal FiOS TV customer.

Our most up-to-date channel lineup is always available online at [Verizon.com/fiostv](http://Verizon.com/fiostv). Just click on the "Channels" tab.
